LOADING INSTRUCTIONS

See accompanying sheet.

HOW TO DRIVE

Joystick - see fig. 1

Keyboard - see fig. 2

HOW TO PLAY

To select your car, race track etc. move joystick left or right and hit fire. Or with keyboard controls use keys H and K, hit J to select. Choose automatic gears, or regular shift for greater acceleration. As soon as you see the GO sign push forward with joystick or hit U to accelerate. Hit RESTORE to abort the game.

SCORING

The score is based on your skill at driving around your selected track. Remember that high average speed is not everything. To score good points you must stay on the road at the right speed in an appropriate gear. You will lose points for overrevving the engine as well as for crashing your car.

TURBO 64 - From the driving seat of your Formula 1 racing car, you have a dynamic view of the road, with scenery changing by real-time signs, leading forward as it does at you. The instruments, gauges, the throttle, gear shift and steering wheel put you in complete control. Find the subtle timing and get your teeth in with two down the straight and round on the bends. That's your driving ability in this multi-player game of skill and being absolute in judgement.
